

# SMP HYDRAULIC QUICK COUPLER

The SMP Hydraulic Quick Coupler has been designed for quick and easy tool changeover times and handling of heavy loads in harsh conditions. The simple but robust design ensures a long service life, even under extreme use. The coupler's low built construction is designed to maintain the excavator's original characteristics, such as break out force, digging angles and more.

Heavy Duty System - A strong combination.

A SMP Deep Bucket HDR / HDS1800 - 5000 L / SAE with SMP Quick Coupler SMP105 – 155

## TECHNICAL SPECIFICATIONS SMP HYDRAULIC QUICK COUPLERS

Model	Locking	Machine size (tonne)	Approx weight kg
SMP35	Hydraulic	1.7 - 8	45
SMP85	Hydraulic	5 - 11	55
SMP25	Hydraulic	11 - 18	85
SMP15	Hydraulic	17 - 30	170
SMP105	Hydraulic	30 - 50	285
SMP155	Hydraulic	55 - 75	600
SMP205	Hydraulic	70 - 90	1000

*Weights can vary depending on design of product*
