

# Clever Design for Maximum Safety

**Constant grip on the front axle**

Excenter locking around the front axle eliminates the risk of dropping the tool.

**Reliable hydromechanical design – without electronic components**

The robust hydraulic and mechanical construction ensures reliability for every job task.

**Clearly visible mechanical safety lock**

The lockable knife wedge system under the rear axle and the excenter locking around the front axle are secured mechanically, while the lock is confirmed by two indicators.

**100% zero play**

HardLock's® double locking elements guarantee zero-play for a secure connection between the quick coupler and connected tools and attachments.

Would you like a smart product with maximum safety? Let us present SMP's HardLock® quick coupler. With a unique excenter locking device and robust design, we are taking safety to a new level.

Be smart and choose a HardLock®.

Model	Locking	Machine size	Approx weight
S45	Hydraulic	5 - 12 ton	90 kg
S50	Hydraulic	5 - 13 ton	90 kg
S60	Hydraulic	12 - 18 ton	170 kg
S70	Hydraulic	17 - 25 ton	320 kg
S80	Hydraulic	25 - 40 ton	430 kg

*Weights may vary depending on the version of the product.*

## About SMP Parts

Since 1980 SMP Parts has been developing and producing equipment for excavators and loaders and today we is one of the leading industry players. In addition to the SMP developed tiltrotator, we offer a wide range of quick couplers, excavator buckets, grading buckets and other accessories. We are proud to produce high quality products and our processes always meet the industry's highest quality and safety standards. By customizing our products, we can find an optimal solution for each customers specific working environment and task. The whole company works towards the same goal - putting yours and other customers' wishes and needs first.

SMP Parts have over 100 employees in Sweden Norway, Finland and Germany and has dealers in Sweden, Norway, Finland, Denmark, Germany the UK, France and the Benelux countries. All development and manufacturing is carried out at the main headquarters and factory in Ilsbo, Sweden.
